

Manufacturing

- ✓ Drugs and medical devices
- ✓ Liquids and semi-solids
- ✓ Clinical labelling and packaging
- ✓ Suitable for clinical trials

Formulation Development

- ✓ Innovative and generic
- ✓ Variety of dosage forms
- ✓ Solubility/bioavailability improvement
- ✓ Preparation of test-articles

Analytical Development

- ✓ Development and validation of analytical and bioanalytical methods (HPLC, GC, LC-MS)
- ✓ Leachables and extractables
- ✓ QC services

Chemical Synthesis

- ✓ Synthetic processes (lab quantities)
- ✓ Compound optimization
- ✓ Custom synthesis of small libraries
- ✓ Synthesis of analogs

ABOUT US

Nextar Chempharma Solutions Ltd. is an Israel-based private company specializing in drugs and medical devices development and manufacturing.

Nextar has been involved in the development of over 150 innovative products, for clients and itself.

We believe that excellency is achieved by flexibility and creativity. Our professional development, production and quality teams will help you find suitable solutions to meet your Target Product Profile and the regulatory requirements. Big pharma companies as well as startups, had found our lean and agile culture attractive whenever a creative and quick solution is required. The experience we have gained over hundreds of projects will be used to get you to the clinic in the most rapid, high quality and cost-effective way.

Nextar is certified for **cGMP & ISO13485**; was successfully audited by the FDA and by **European notified bodies**, and its products are widely used in Israeli and worldwide clinical studies.
